

# Google Re-Captcha v3

*Implements latest Captcha by Google to:  
Login, Registration and Contact Form*

## Available languages

English | Spanish

Also you can translate in your language at **Prestashop backoffice** following this steps:

1. Go to **International > Translations**
2. **Type of translation** select: **Installed modules translations**
3. **Select your module:** find the name of this module in the list and choose it.
4. **Select your language:** Choose the language you want to translate and click in **Modify button**.

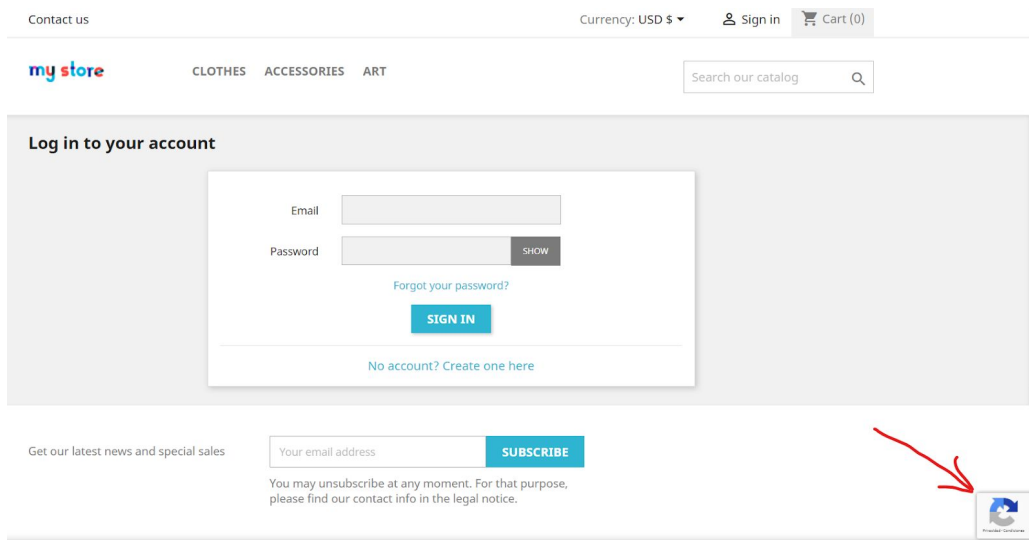

## Installation

Simply install the module, go to module configuration and set the Google reCaptcha v3 Site and Secret keys.

## Using the module

After following the steps to configure it, you can enable to use reCaptcha in Login, Registration and Contact Form.

Each section enable, users will see reCaptcha certification at bottom right side as it show in the next screenshot:

***This certification guarantees you that Google prevents bots inserting fake information or trying to hack your web site.***
